

Babatunde C. Atijosan

Senior front-end software developer

Summary

Dedicated Senior Front-End Software Developer with over 5 years of hands-on expertise in crafting exceptional user interfaces and driving web application development. Proficient in a wide range of front-end technologies, including HTML, CSS, JavaScript, React, and JavaScript. By translating complex design concepts into responsive, high-performance, and visually appealing user experiences. Proven track record of leading cross-functional teams, streamlining development processes, and consistently delivering projects on time and within scope. Committed to staying at the forefront of emerging technologies and best practices to ensure the highest quality standards. Seeking new level to leverage my skills in enhancing digital products and driving user engagement.

Professional Experience

Front-End Developer Contract • **TEKU** Aug 2023 – Nov 2023

- Developed user-friendly web pages using React, JavaScript, sass and Redux ensuring seamless and engaging user experiences across various platforms.
- Actively maintained and continuously improved the website, implementing updates, bug fixes, and performance optimizations to deliver a smooth and reliable user experience.
- Ensured high-quality graphic standards and brand consistency, adhering to established guidelines and design principles to maintain a cohesive visual identity across the website.

Senior Front-End Developer • **Ultainfinity** May 2022 - Sep 2023

- Integrated crypto payment gateway for various web applications with web3
- Managed and executed multiple projects simultaneously to meet critical deadlines.
- Performed Code check-in, check-out, merging and branching into GIT and stayed up-to-date along with the team
- Seamlessly collaborated with the back-end and design team to create leading-edge web applications that meet users' requirements.

Front-End Developer Contract • **FITFIXAM** Nov 2021 - Feb 2022

- implemented pixel-perfect, responsive web interfaces in collaboration with the design team.
- Built and maintained web apps with NEXTJS for peak performance and code re-usability.
- Conducted code reviews, optimized performance, and tackled cross-browser compatibility.
- Optimized applications for maximum speed, employing best practices such as code optimization, caching, and efficient resource management to achieve optimal performance.

Front-End Developer • **Techpet** Feb 2020 - AUG 2022

- Played an integral role as a member of a collaborative team that developed Appera, a highly efficient cloud-based collaboration and project management tool tailored to meet the needs of businesses across various sizes and industries.
- Demonstrated expertise in building reusable React components, utilizing best practices and modern tools such as Tailwind for efficient styling and consistent UI design.
- Took an active role in facilitating the merging of pull requests on Git created by interns, ensuring smooth collaboration and efficient integration of their contributions into the project code base.
- Utilized Cypress to write comprehensive unit and integration tests, validating the functionality, reliability, and performance of the Appera application to ensure a high-quality user experience.
